

# 2023 ANNUAL CRIME REPORT

NEW BEDFORD  
**Police Department**

Welcome to the 2023 New Bedford Crime Analysis Report, a comprehensive overview of the city's law enforcement landscape and the strides made in fostering a safer community. This annual report is a testament to our commitment to transparency, accountability, and proactive measures to address crime. In an era where public trust in law enforcement is paramount, we recognize the pivotal role of open communication and data-driven insights in fostering a harmonious relationship between the police and the community they serve.

Transparency and accountability are the cornerstones upon which effective policing is built. In New Bedford, we understand that cultivating trust with our residents requires a commitment to openness regarding our operations, policies, and outcomes. Through initiatives like community policing, accessible data repositories, and regular reports such as this, we strive to bridge the gap between law enforcement and the public, fostering an environment of mutual understanding and cooperation. We firmly believe that transparency enhances public confidence and enables us to learn, adapt, and improve our practices continuously.

In line with our dedication to progressive policing practices, we reaffirm our commitment to Integrating Communications, Assessment, and Tactics (ICAT) training. This evidence-based approach equips our officers with the necessary tools to effectively manage crisis situations while prioritizing de-escalation and minimizing the use of force. Investing in comprehensive training programs empowers our personnel to navigate complex scenarios with empathy, composure, and respect for human dignity, thus fostering safer interactions and reducing the likelihood of unnecessary conflict.

As we navigate the evolving law enforcement landscape, we recognize the importance of bolstering our ranks with dedicated, community-minded professionals. Whereas 2023 was an unfortunate year for staffing, there is ample reason to be optimistic for a better 2024. A number of officers have returned to our department, and we continue to train more recruits. We have intensified our efforts to recruit and hire a diverse group of police officers who reflect the demographics and values of the communities they serve. By fostering inclusivity and diversity within our ranks, we aim to strengthen trust, enhance cultural competence, and promote a more equitable approach to policing. Through strategic recruitment strategies and competitive incentives, we remain steadfast in our commitment to building a resilient, responsive, and community-oriented police force that stands as a beacon of safety and service in New Bedford.

I want to extend my heartfelt thanks to the people of New Bedford for their unwavering support and cooperation. Your partnership is invaluable as we strive for a safer community. I also want to recognize the dedication of our police department staff, whose hard work and commitment continue to make our achievements possible.

Chief Paul Oliveira

## 2. Methodology

In addition to specific methodological methodologies listed throughout this report, general methodology can be found below.

### 1. Best Data at the Time

All statistics, including yearly totals, are calculated using the best available data at the time. Occasionally, after our reports are published, factors determined during investigation will cause us to reclassify a crime to a higher or lower category, and discrepancies between current and past reports may result. In all cases, the more recent data is the more correct data.

### 2. Crime Incident Calculations

Crime incidents are calculated in this report using NIBRS categories, without hierarchy calculation and with related/duplicate incidents excluded. That is, incidents with offenses in multiple categories will count to each category for which an offense is present, multiple arrests from a single incident are counted as one incident, and arrests where there is also an incident report are excluded. Incidents with multiple offense categories within a NIBRS category, such as Larceny/Theft Offenses (23A-H) or Sex Offenses (11A-D; 36A-B,360), are counted once to the NIBRS category as indicated in the report, rather than once per unique offense category. In the case of assaults, simple assaults are excluded where an aggravated assault charge is also present.

As such, the numbers reported in this document will vary from those calculated by the FBI UCR/NIBRS program, with the variation differing depending on the characteristics of each NIBRS category and their position within the NIBRS hierarchy. A comparison of prior FBI UCR/NIBRS data indicates that trends are similar in nature to those found in this report.

### 3. Demographics

The categories used by New Bedford Police Department's (NBPD) Record Management System (RMS) to record race data follow FBI UCR Program categories and are outlined below in Table 2.3.1. These categories can be compared with Census race categories provided in Table 2.3.2. Of note in the New Bedford context two Census categories in the 2020 Decennial Census<sup>1</sup> that are not present in the NBPD RMS, *Some Other Race alone* and *Two or more races*, comprised approximately 31% (total) of the New Bedford population.

An individual's race in the NBPD's RMS is obtained from a range of various sources, including partner agencies and officer observation. A record of the source and when it was entered or updated is not stored within the RMS.

For these reasons, comparing NBPD's race populations with self-reported census data is problematic and cautioned against.

Also following FBI UCR Program protocol is the ethnicity of individuals, which is stored in the NBPd RMS as a separate variable and comprises the three categories listed in Table 3.2.3. As with race data, an individual’s ethnicity in the NBPd’s RMS is obtained from a range of various sources, including partner agencies and officer observation. A record of the source and when it was entered or updated is not stored within the RMS. Again, for these reasons, comparing ethnic populations with self-reported census data is problematic and cautioned against.

Race and ethnicity are provided in this report by the cross-tabulation of race and ethnicity.

#### 4. Arrest Calculations

All arrest calculations are made excluding protective custodies.

#### 5. Calls For Service

In New Bedford, Calls For Service (CFS) represent all non-administrative calls, from all call sources. Both calls initiated by a member of the public, through telephone or walk-ins, and calls that are officer initiated are included. Calls are not differentiated by whether or not an officer is listed as being dispatched, as some calls, for example when a desk officer investigates a walk-in complaint, are built without a unit ‘dispatched’ to the call.

#### 6. Mapping

Incidents in the maps included in this document are each represented by a dot/point. In the instance of multiple incidents at a given address, the dots will appear as one, ‘stacked’ on each other. As such, the number of dots/points on a graph may not add to the number of incidents reported.

### 3. Overview

As defined by the FBI’s Uniform Crime Reporting Program, Part A violent crimes consist of murder (09A), rape (11A-D), robbery (120) and aggravated assault (13A). Arson (200), burglary (220), larceny (23A-H), and motor vehicle theft (240) are in the Part A property crime category. Table 3.1 shows the crime totals.

Between 2014 and 2023 violent crime incidents in New Bedford decreased by 58%, from 1,172 to 490 incidents. Robbery incidents decreased 61%, rape incidents decreased by 34% and aggravated assaults decreased by 62%. Property crime decreased by 54% between 2014 and 2023, from 3,452 to 1,583 incidents, with a 71% decrease in burglaries, a 57% decrease in larcenies and a 68% decrease in arson. There was a 34% increase in motor vehicle theft in the same time period.

<sup>2</sup> Due to incidents having multiple offense categories, the number of incidents in each category do not sum to the totals. For violent crime the difference is largely due to the number of robberies that also include an aggravated assault offense and are thus counted in each category in this report, but only once to the total.

## 4. Homicide

In 2023, there were four reported homicides in the city of New Bedford, each with a single victim. This was an increase of one from 2019, when there were 3 homicides, as represented in Figure 4.1. All four cases were solved.

**Figure 4.1: Homicide (NIBRS 09A) Incidents, New Bedford, MA, 2019-2023.**

Firearms were the most common weapon used in homicides in 2023 and were used in three of the four incidents.

**Table 4.1 Weapon used in homicides, 2023, New Bedford.**

Weapon Used	Count
Firearm	3
Knife	1

## 5. Sexual Assault

The number of reported sexual assault incidents in 2023 was 87, a decrease of 43 incidents (-33%) from 2019's 130 incidents.

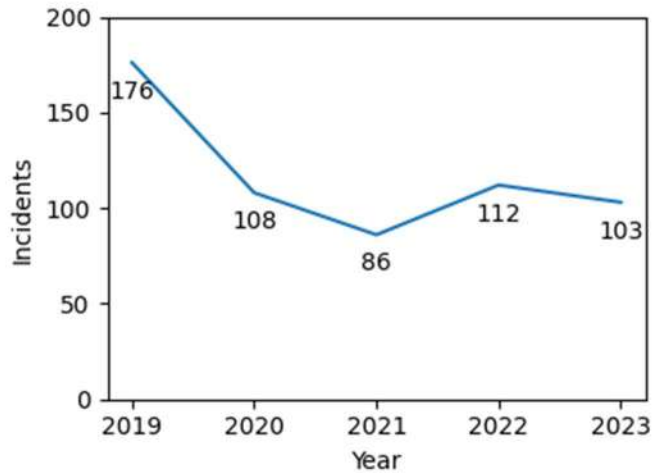

**Figure 5.1: Sexual Assault (NIBRS 11A-D) incidents, New Bedford, MA, 2023.**

## 6. Robbery

The number of robbery incidents reported in New Bedford in 2023 was 103, a decrease of 73 (-41%) from 2019, when there were 176 robberies reported. Of the 103 robberies, 47 were armed robberies and 56 were unarmed robberies.

**Figure 6.1: Robbery (NIBRS 120) Incidents, New Bedford, MA, 2023.**

Firearms were reported as having been used in 17 of the 103 robberies in 2023. Knives were used in 26 robberies, during one of which a firearm was also present. Blunt objects were used in 5 robberies.

## 7. Assault

### 1. Aggravated Assaults

The number of incidents containing an aggravated assault offense in New Bedford in 2023 totaled 320, a 18% decrease (69 incidents) from 2019, when there were 389 aggravated assault incidents reported. As shown in *Section 16*, the proportion of aggravated assaults incidents in 2023 that were domestic involved was 39%.

**Figure 7.1.1: Aggravated Assault (NIBRS 13A) Incidents, New Bedford, MA, 2019 - 2023.**

Across the year, the most aggravated assaults took place in the hour between 5pm and 6pm, with 23 aggravated assaults during this hour of the day. The most aggravated assaults took place on a Friday, with 64 aggravated assaults. Saturday was the second busiest, with 52 incidents. Tuesdays had the fewest aggravated assaults reported, with 35 incidents.

Friday, between 3pm and 4pm, and between 5pm and 6pm, were the two highest single hours of the week with 7 aggravated assaults taking place during each of these hours of the week. This was followed by Fridays between 7pm and 8pm, and Saturdays between 5pm and 6pm with 6 each. The least busy hours were generally between 3am and 10am during weekdays.

Looking at the age of victims of aggravated assault, those aged between 30 and 34 years (inclusive) were the largest age group. This group was followed by 20–24-year-olds and 25–29-year-olds as the two second largest age groups.

**Figure 7.1.2: Age of Aggravated Assault Victims, New Bedford, MA, 2023.**

## 2. Simple Assaults

The number of simple assault incidents reported in New Bedford totaled 1,415 in 2023, a decrease of 217 incidents (-13%) from 1,632 incidents in 2019. As shown in *Section 16*, 56% of simple assaults were domestic involved.

**Figure 7.2.1: Simple Assault (NIBRS 13B) Incidents, New Bedford, MA, 2019 - 2023.**

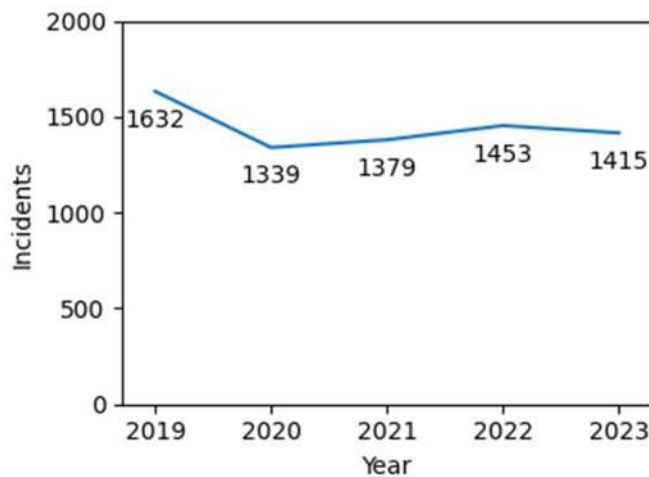

Table 7.2.1 shows that simple assaults most frequently took place on Sundays (245), with Saturday second most common day of the week (219). Thursdays and Mondays had the fewest simple assault incidents (170 and 179 respectively). The busiest hour of the day was 6-7pm (100), with 4-5pm and 8-9pm the two second busiest hours (97) and 5-6am the least busy hour of the day (17). Sunday between 2-3am was the busiest hour of the week, with 22 incidents.

Looking at the age of victims of simple assault, those aged between 35 and 39 years (inclusive) were the largest age group. This group was followed by 30–34-year-olds, which were the second largest age group.

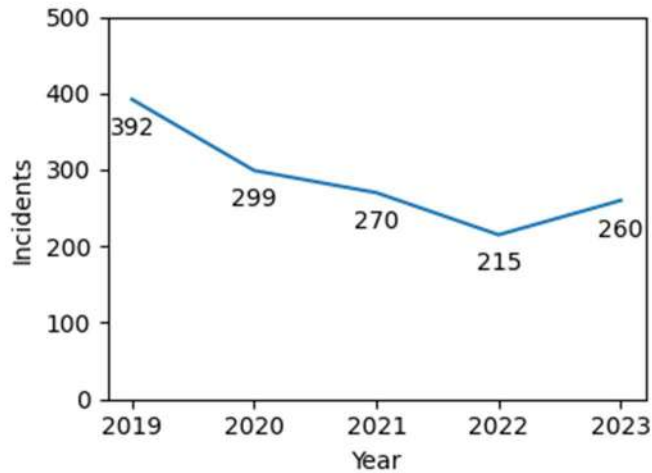

**Figure 7.2.4: Age of Simple Assault Victims, New Bedford, MA, 2023.**

## 8. Burglary/B&E

In 2023 there were 260 burglary/B&E incidents in New Bedford, as defined by the NIBRS 220 category<sup>3</sup>, 'the unlawful entry into a building or other structure with the intent to commit a felony or a theft.' This was a decrease of 132 incidents (-34%) from 2019, when there were 392 incidents.

**Figure 8.1: Burglary/B&E (NIBRS 220) Incidents, New Bedford, MA, 2019 - 2023.**

When considering burglaries/B&Es by month, July was the highest, with 36 incidents, followed by April with 29. January had the fewest burglary/B&Es, with 9 incidents.

**Figure 8.1: Burglary/B&E (NIBRS 220) Incidents, New Bedford, MA, 2023.**

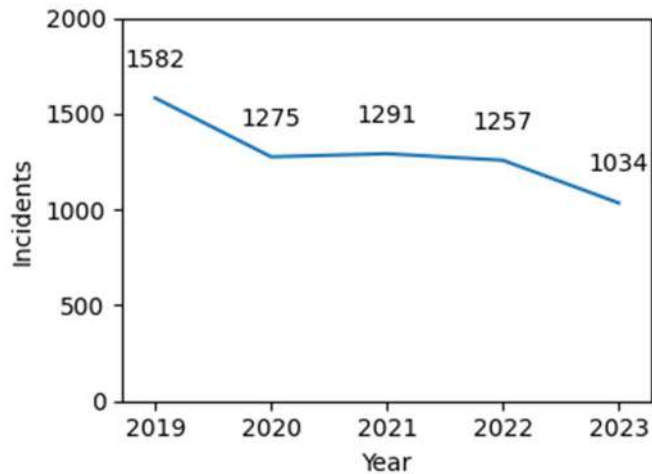

<sup>3</sup> Per NIBRS, B&E into motor vehicle is contained within larcenies.

## 9. Larceny

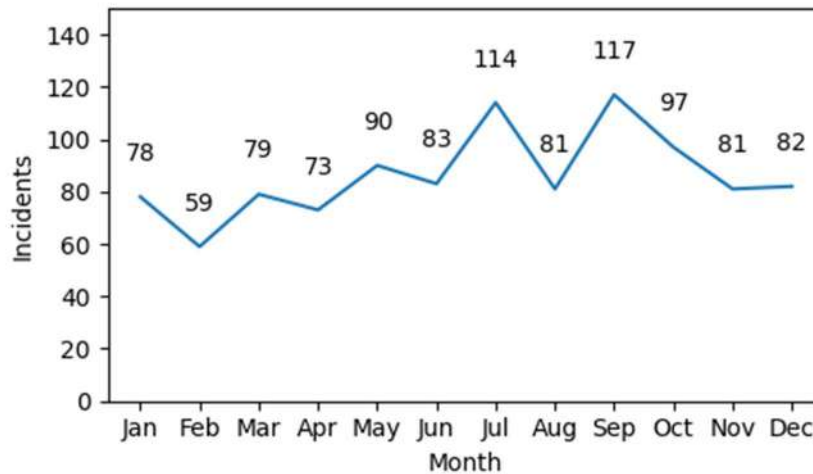

There were 1,034 larcenies<sup>4</sup> reported in New Bedford in 2023, an overall decrease of 548 incidents (35%) from the 1,582 reported in 2019, following a flat period between 2020 and 2022.

**Figure 9.1: Larceny (NIBRS 23A-H) Incidents, New Bedford, MA, 2019-2023.**

By month, September was the busiest month of the year for larcenies, with 117 incidents reported, followed by July with 114. February and April, with 59 and 73 incidents respectively, had the fewest incidents.

**Figure 9.2: Larceny (NIBRS 23A-H) Incidents, New Bedford, MA, 2023.**

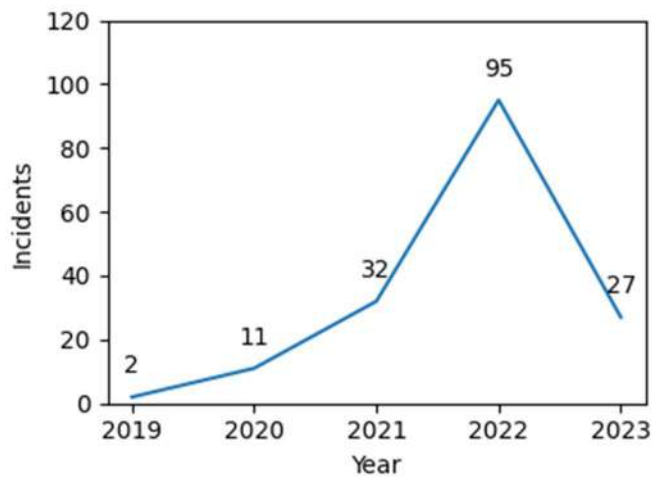

<sup>4</sup> As defined by the NIBRS 23A-H categories

## 1. Catalytic Converters

There was a significant decrease in the number catalytic converter thefts reported in New Bedford in 2023, following national trends associated with the prior increase in price of platinum-group metals. In 2023 there were 27 incidents of catalytic converter theft reported in New Bedford, compared with the peak of 95 incidents in 2022 and two in 2019.

With incidents where multiple vehicles were targeted and the number of catalytic converters on vehicles varying depending on the specific vehicle model, a total of 41 catalytic converters were reported stolen in 2023.

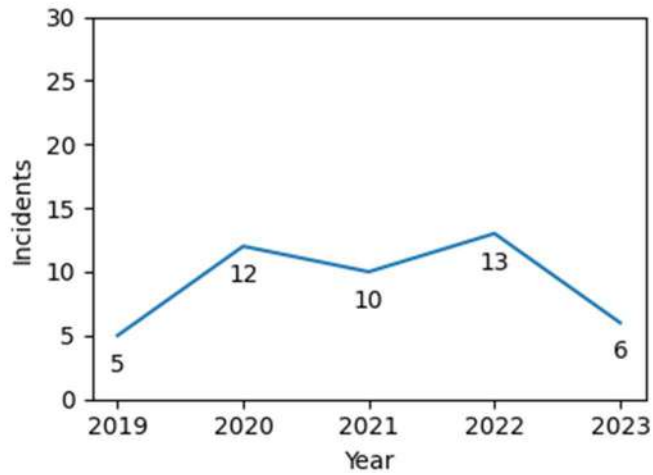

**Figure 9.1.1: Catalytic Converter Theft Incidents, New Bedford, MA, 2019-2023.**

## 10. Arson

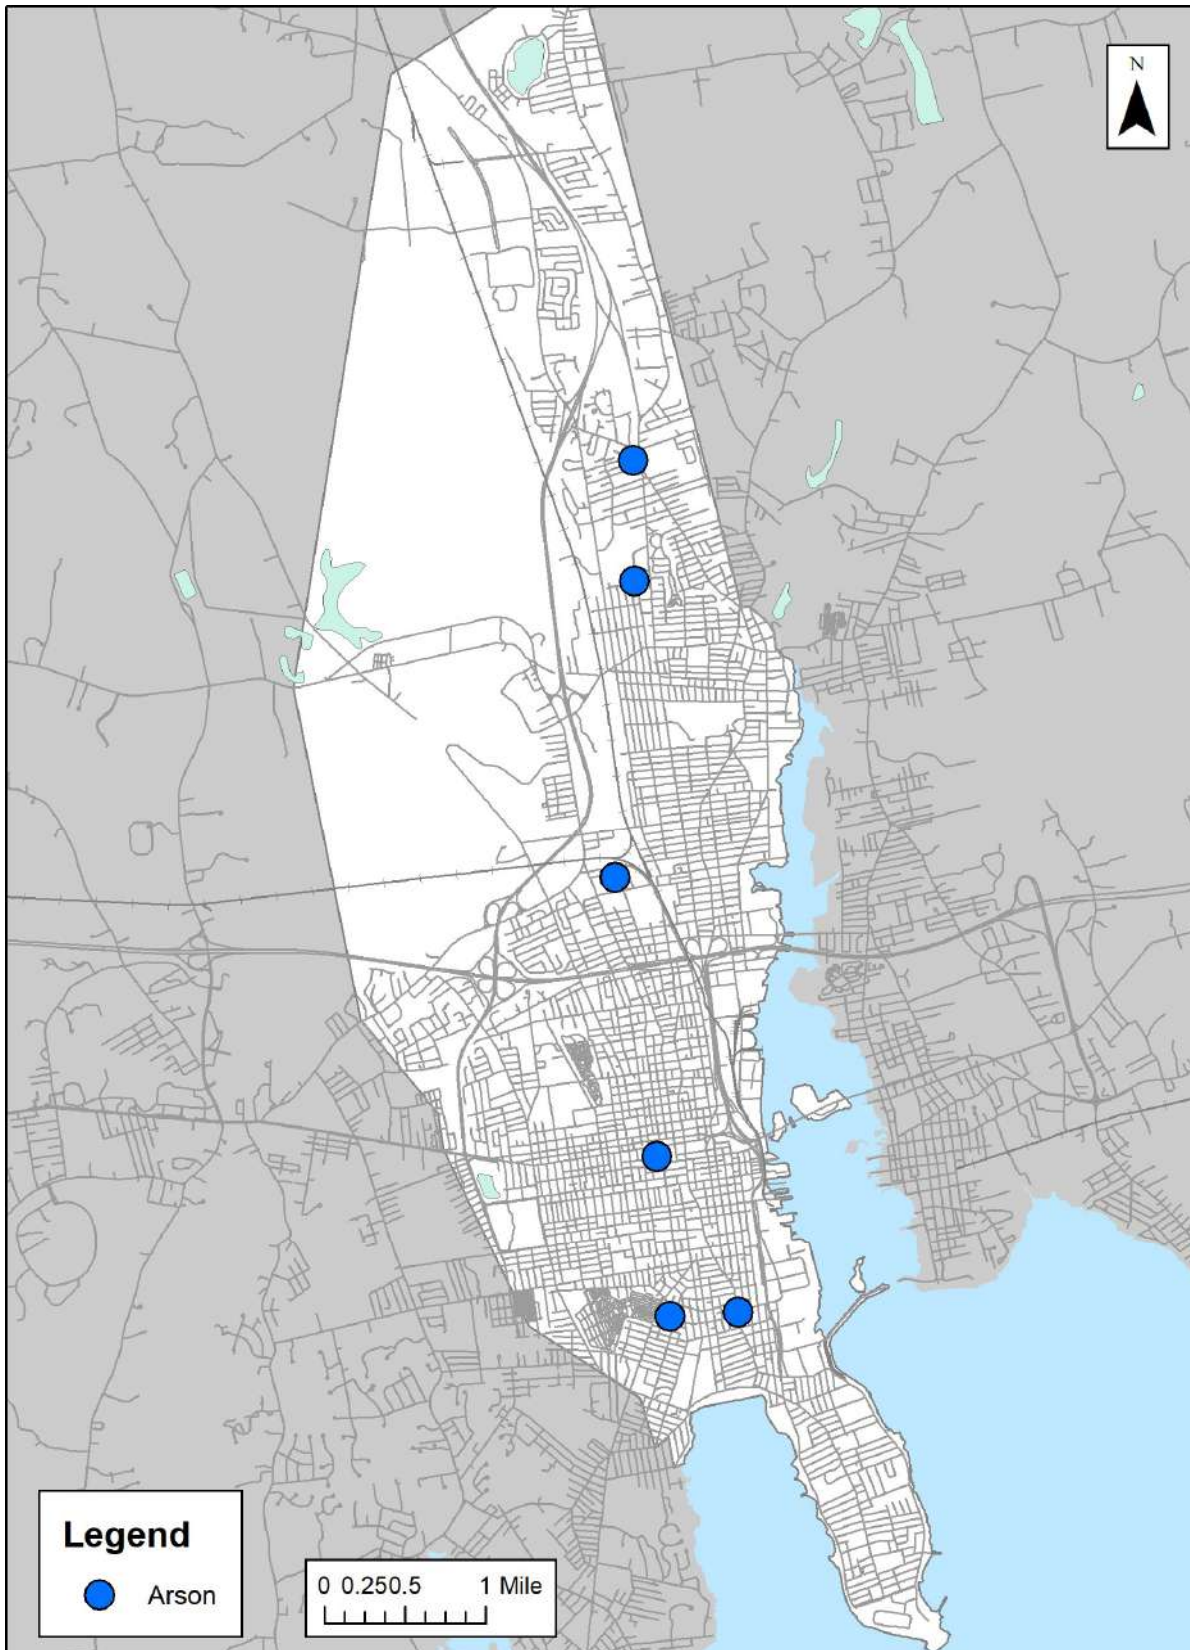

In 2023 there were six arson incidents (NIBRS 200) reported to the New Bedford Police Department, an increase of one incident (+20%) from the five arson incidents reported in 2019. A map of arson incidents can be found in Figure 10.2.

**Figure 10.1: Arson Incidents, New Bedford, MA, 2019 - 2023.**

The geographic distribution of arsons in New Bedford in 2023 is provided on the following page in figure 10.2.

Fig 10.2: Map of Arson Incidents, New Bedford, MA, 2023.

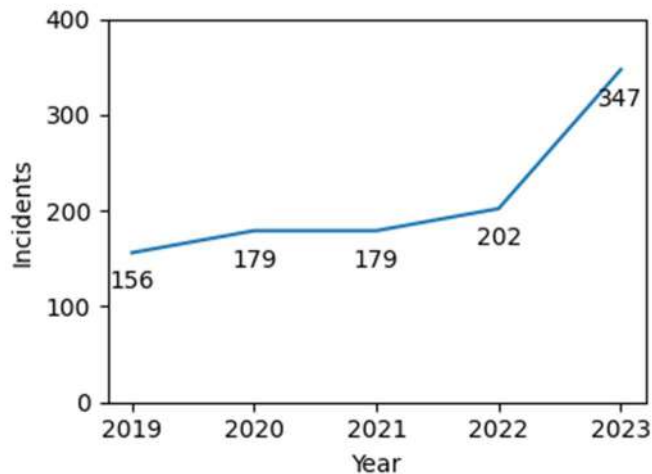

## 11. Motor Vehicle Theft

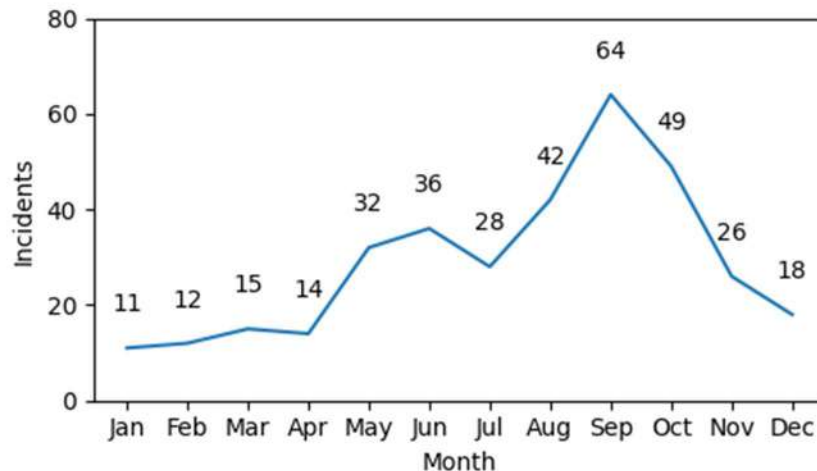

In 2023 there were 347 motor vehicle theft (NIBRS 240) incidents reported in the city of New Bedford. There has been an increase of 184 incidents (+117%) since 2019, when there were 156 thefts, with most of the increase between 2022 and 2023 attributable to a TikTok “Kia Challenge” involving Hyundais and Kias.

**Figure 11.1 MV Theft (NIBRS 240) Incidents, New Bedford, MA, 2019 - 2023.**

By month, motor vehicle thefts trended up from 11 incidents in January through September when they peaked at 64 incidents, before trending down through December (18 incidents). Of the 347 motor vehicle theft incidents in 2023, 53 were attempted thefts and 294 were successful thefts. With multiple vehicles being taken in five incidents, a total of 299 vehicles were successfully stolen in 2023<sup>5</sup>.

**Figure 11.2 MV Theft Incidents (NIBRS 240) by Month, New Bedford, MA, 2023.**

<sup>5</sup> Subsequent analysis of ‘vehicles stolen’ refer only to those successfully stolen.

Per NIBRs definitions, all land based motorized vehicles (that do not run on rails) are included in the stolen motor vehicle category. As such, scooters, mopeds and recreational vehicles, which represent 55 (18%) of the 299 vehicles stolen in New Bedford in 2023, are included in this category.

All Others	228
Total	299

Excluding bikes, scooters and mopeds, Hyundai, Honda, Kia, Chevrolet and Ford vehicles were the top five stolen vehicle makes in New Bedford in 2023. Reflecting the TikTok challenge, Hyundai Elantras and Hyundai Sonatas were the two most stolen vehicle models in New Bedford in 2023, with Kia Sportages the fifth most frequently stolen. Honda Accords and Honda Civics were the third most commonly stolen model.

Evenings between 6 and 7pm were the busiest hour of the day for domestic assaults, with 69 incidents, while Fridays between 7pm and 8pm and Sunday between 2am and 3am were the single busiest hour across the week with 15 incidents each. In general, the pattern across the day and week resembled domestic verbal arguments and overall assaults.

<sup>11</sup> Per NIBRS 13A and 13B definitions.

The victims of domestic assault were predominantly female, with 61% of victims female. This contrasts with non-domestic assaults, where the majority (61%) of victims were male.

**Figure 16.2.2: Sex of Victim, Domestic and Non-Domestic Assault, New Bedford, MA, 2023**

	<b>Domestic</b>	<b>Not Domestic</b>
Male	39%	61%
Female	61%	39%
Total	100%	100%

When examined alongside the victims of domestic violence and simple vs. aggravated assaults, a pattern emerges. Specifically, females are more likely to be the victim of domestic assault and these incidents are more likely to be simple, rather than aggravated, assaults. On the other hand, males are more likely to be the victim of non-domestic assaults and a higher percentage of these are aggravated assaults.

## 17. Overdoses

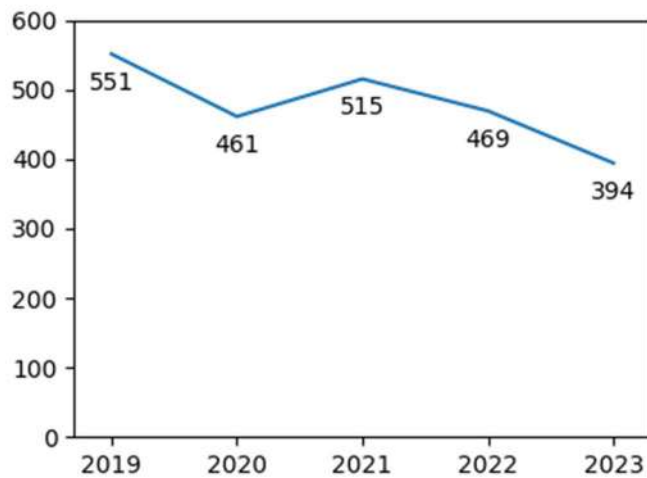

Fatal overdoses<sup>12</sup> recorded by the New Bedford Police Department decreased by five from 50 in 2019 to 45 in 2023, a decrease of 10%.

**Figure 17.1: Fatal Overdoses, New Bedford, MA, 2019-2023**

There were 394 non-fatal overdoses recorded by the New Bedford Police Department in 2023. This was a decrease of 28% from the 551 recorded in 2019.

**Figure 17.2: Non-Fatal Overdoses, New Bedford, MA, 2019-2023**

---

<sup>12</sup> Overdose incidents are recorded based on the information available to officers at the scene of the incident and offer some of the most immediate source of data available to the community. As such, these numbers will differ from those gathered through other sources such as toxicology or death records.

## 1. Demographics

Victims of overdoses were predominately male, with 31 (69%) of the 45 fatal overdose victims male, and 262 (66%) of the 395 non-fatal overdose victims<sup>13</sup> male. Females represented 31% of fatal overdoses and 34% of non-fatal overdose victims.
